1. S3 Bucket Before CleanUp

2. S3 After Clean-Up

3. IAM Role

4. Lambda Code

The screenshot displays the AWS Lambda console interface for a specific function. The main area shows the function's code, which is a Python script using the `boto3` library to interact with Amazon S3. The code lists objects in a bucket, checks if the 'Contents' key is present in the response, and if not, prints a message. It then sets a threshold for the final submission (30 days) and iterates through the response to delete objects whose 'LastModified' date is older than the threshold.

On the left sidebar, there are sections for **DEPLOY** (with buttons for 'Deploy (Ctrl+Shift+U)' and 'Test (Ctrl+Shift+I)'), **TEST EVENTS** (with a 'Create new test event' button and a 'Private saved events' section), and **ENVIRONMENT VARIABLES**.

The right sidebar shows the **Invocation type** (Synchronous) and **Event sharing settings** (Private).

The bottom section, titled **Execution Results**, displays the function logs. The logs show the start of the function execution, the request ID, the deleted files (file1.txt, file2.txt, file3.txt), the end of the execution, and the report ID. The duration of the execution is 368.19 ms, and the billed duration is 369 ms. The memory size is 128 MB, and the maximum memory used is 98 MB.

```
10 response = s3.list_objects_v2(Bucket=BUCKET_NAME)
11
12 if 'Contents' not in response:
13     print("Bucket is empty.")
14     return
15
16 # Change to 30 days for final submission
17 threshold = datetime.now(timezone.utc) - timedelta(
18     days=30
19 )
20
21 deleted_files = []
22
23 for obj in response['Contents']:
24     if obj['LastModified'] < threshold:
25         s3.delete_object(
26             Bucket=BUCKET_NAME,
27             Key=obj['Key']
28         )
29         deleted_files.append(obj['Key'])
30
31 print(deleted_files)
```

Function Logs:

```
START RequestId: b5f63b1e-289e-43b7-98c3-4c4ce6fa50e4 Version: $LATEST
Deleted files:
file1.txt
file2.txt
file3.txt
END RequestId: b5f63b1e-289e-43b7-98c3-4c4ce6fa50e4
REPORT RequestId: b5f63b1e-289e-43b7-98c3-4c4ce6fa50e4 Duration: 368.19 ms Billed Duration: 369 ms Memory Size: 128 MB Max Memory Used: 98 MB
```

5. Lambda Test Results
